

**Undergraduate Student Commitment**  
**Faculty of Medicine and Health Sciences**  
**Stellenbosch University**

As I enter my period of training at Stellenbosch University's Faculty of Medicine and Health Sciences, I commit to the process of growing into a health care professional who respects life; cares for myself; and relates to others with dignity, integrity and compassion.

I shall value who I am and can become, as much as I value others for who they are and can become.

I shall question and resist any ideas and practices which divide, and strive at all times to promote inclusivity, fairness and justice.

In the fast-changing world of health sciences, I shall remain a curious and creative learner; respecting diverse ideologies, ideas, contexts and solutions which matter most to patients and communities.

I shall work with learners from other health professions as equal partners in striving for excellence in health care.

I commit to becoming an agent of change; working with others to positively influence our learning environment, as well as the healthcare experiences and outcomes of those we serve.

Finally, I accept my responsibility to help build a sustainable future for us all while using resources with care, creativity and diligence.

I make this commitment freely and sincerely.
