
The background features several large, stylized, hand-drawn swirls in purple, green, and light blue. Interspersed among these swirls are numerous small, yellow, starburst-like shapes, some pointing towards the center and others pointing outwards, creating a festive and celebratory atmosphere.

VALENTINES DAY  
AT  
MTN SCIENCE CENTRE  
2010

The Division of Anatomy and Histology of Stellenbosch University took part in a MTN Science Centre Valentines programme on 13 February 2010. Frank Sitzer, a technical official in the division entertained the children and parents. He dissected pig hearts, where after the children enjoyed the touch and feel session. He also informed them about the function of the heart. On display a few sample's from the Anatomy Museum, highlighting heart disease and importance of exercise.

Gabi Gelderblom, the Marketing Co-ordinator of MTN Science Centre, conveyed her sincere appreciation towards the Stellenbosch University, the Faculty of Health Sciences and the division for their participation in the programme.
