

BIOGRAPHY

of

Ingrid Webster

Ingrid joined the Division of Medical Physiology (Tygerberg) in 2001 as a technical research assistant, after completion of her honours degree in Physiology at the University of Stellenbosch, main campus. Since then she successfully completed both an MSc and a PhD degree, and 3 years of post doc fellowship before receiving a Research Career Advancement Award from the NRF and DST for 5 years on the effect of rooibos and melatonin supplementation during antiretroviral therapy. She is currently working on the EndoAfrica project.
