

I recently qualified as cardiologist at the Division of Cardiology, University of Stellenbosch and Tygerberg Hospital. I have a special interest in advanced cardiac imaging which includes evaluation and peri operative guidance of structural heart interventions e.g. TAVI, ASD closure etc. I am a philanthropist at heart and believe in equal access of all patients to health care. Currently I am the chairman of SUNheart that aim to further realize the potential of the division of cardiology.

Ek het onlangs gekwalifiseer as 'n kardioloog by die Divisie van Kardiologie, Univesiteit van Stellenbosch en Tygerberg Hospitaal. My areas van belangstelling is gevorderde kardiaale beelding met klem op evaluasie en peri operatiewe ondersteuning van strukturele hart intervensies byvoorbeeld TAVI, ASD sluiting ens. Ek het ook 'n filantropiese uitkyk op gesondheidsorg en glo in die beginsel van gelyke toegang vir alle pasiente to mediese sorg. Tans is ek die voorsitter van SUNheart wat ten doel het om hierdie ideale te verwesenlik.
