

## 5.3.1.14 MMed Orthopaedics MMed (Orthop)

### Specific admission requirements

The following specific admission requirements apply in addition to the general admission requirements for MMed programmes as mentioned in section 5.3.1 above:

- Recommendations for appointment of registrars include the following:
  - successful completion of the primary examination of the College of Orthopaedic Surgeons of the Colleges of Medicine of South Africa (CMSA) (FC Orth(SA) Primary);
  - at least 18 months' experience in Orthopaedics under supervision of a specialist, after completion of community service;
  - appropriate diplomas, for instance Advanced Trauma Life Support (ATLS) and Basic Surgical Principles; and
  - a basic research project on an orthopaedic topic and/or a Diploma in Orthopaedics.

### Duration of programme

The programme extends over five years.

### Programme content

Anatomical Pathology	874(25)
Anatomy	875(25)
Physiology	874(25)
Orthopaedic Surgery (Intermediate)	871(100)
Orthopaedic Surgery	873(185)
Research Assignment	825(120)

### Assessment and examination

#### Primary

- A written paper and an oral examination for the Anatomical Pathology 874 module.
- Examinations for the Anatomy 875 and Physiology 874 modules are conducted by the College of Orthopaedic Surgeons of the CMSA (FC Orth(SA) Primary).
- You must obtain a mark of at least 50% to pass a module and 75% to pass a module with distinction.
- You must pass all three modules (Anatomical Pathology 874, Anatomy 875 and Physiology 874) either before registration for the MMed (Orthop) programme or within 12 months of registration.
- If you do not meet this requirement, you may be excluded from the rest of the MMed (Orthop) programme.
- Only in exceptional cases, and with the submission of an appropriate motivation, will the Postgraduate Programme Committee of the Division of Orthopaedics consider continuation of your service in a registrar post and further attendance of the programme.

#### Intermediate

- A written paper and an oral examination for the Pathology component of the Orthopaedic Surgery (Intermediate) module.
- The examination for the Orthopaedic Surgery (Intermediate) 871 module is conducted by the College of Orthopaedic Surgeons of the CMSA (FC Orth(SA) Intermediate).
- You must obtain a mark of at least 50% to pass the module and 75% to pass the module with distinction.
- You must pass the intermediate examination within 30 months of registration as a registrar in Orthopaedics.
- If you do not meet this requirement, you may be excluded from the rest of the MMed (Orthop) programme.

- Only in exceptional cases, and with the submission of an appropriate motivation, will the Postgraduate Programme Committee of the Division consider continuation of your service in a registrar post and further attendance of the programme.

### Final examination

- The Health Professions Council of South Africa (HPCSA) requires that you successfully complete the national exit examination of the College of Orthopaedic Surgeons of the CMSA to register as a specialist.
- The Division accepts this examination as equivalent to and in place of the MMed (Orthop) final examination.
- It, however, remains the responsibility of the head of the Division to confirm the following:
  - successful completion of clinical training time;
  - completion of a comprehensive logbook;
  - successful completion of the research assignment according to the regulations of the University in this regard; and
  - successful completion of the flexible assessment programme.
- For admission to the single national exit examination of the College of Orthopaedic Surgeons of the CMSA, you must have successfully completed the following:
  - the primary examination of the College of Orthopaedic Surgeons of the CMSA; and
  - the intermediate examination of the College of Orthopaedic Surgeons of the CMSA.
- The minimum pass mark for the final examination is 50%, and you must obtain 75% to pass the examination with distinction.
- You must successfully complete the final examination within 60 months of registration as a registrar in Orthopaedics. If you do not meet this requirement, you must vacate the registrar post.
- Only in exceptional cases, and with the submission of an appropriate motivation, will the Postgraduate Programme Committee of the Division consider continuation of your service in a registrar post and further attendance of the programme.

### Research assignment

- You must complete an assignment as a study project that forms part of the final assessment for the MMed (Orthop) degree.
- The protocol for the assignment must be approved by the Postgraduate Programme Committee of the Division and the relevant faculty structures not later than 18 months after commencement of service as a registrar.
- The assignment must be successfully completed not later than 48 months after commencement of service as a registrar.
- The assignment is assessed and approved by both internal and external examiners.
- You must obtain a mark of at least 50% to pass the assignment, and at least 75% to pass with distinction.

### Exit criteria

- The final mark for the MMed (Orthop) programme is calculated as the average of the marks for the respective modules, the assignment and the final examination.
- You must achieve a final mark of at least 50% to obtain the MMed (Orthop) degree, and at least 75% to pass the degree with distinction.

## 5.3 Master's degrees

### 5.3.1 Master of Medicine

#### General admission and selection requirements for the MMed programmes

- The following apply to all MMed programmes:
  - For admission to the MMed degree programme, you must have held an MBChB degree from this University or another qualification considered as sufficient by this University for at least three years prior to application, and must be registered with the Health Professions Council of South Africa as medical practitioner in the category independent practice.
  - If you specialise in Anaesthesiology, Neurosurgery, Emergency Medicine, Otorhinolaryngology, Orthopaedics, and Plastic and Reconstructive Surgery, you must also have completed suitable courses such as ATLS (Advanced Trauma Life Support), ACLS (Advanced Cardiovascular Life Support), PALS (Paediatric Advanced Life Support) and APLS (Advanced Paediatric Life Support). Consult the specific requirements at each programme.
  - If you would like to register as an MMed student with the University, you must occupy a registrar post with the Western Cape Provincial Department of Health and Wellness or the National Health Laboratory Services. Exceptions to this rule will be considered in the following instances:
    - where you register as an occasional student with the University (refer also to the section on admission as an occasional student in Part 1 (General Rules) of the Yearbook) with the sole purpose of attempting the primary subjects prior to registering as an MMed student and to obtaining a position as registrar; and
    - where you have completed your training time and you are only registering to complete your research assignment.
- If you apply for a training post at the Tygerberg Hospital, the Western Cape Provincial Department of Health and Wellness or another institution considered as equivalent by this University, you must make sure of the programme-specific recommendations which apply to your MMed programme. Direct any enquiries in this regard to the programme leader of your specific programme.

#### Application procedure and closing date

Apply in writing. Senate, or the Executive Committee acting on its behalf, will decide whether you are to be admitted to the MMed programme.

There is no specific closing date for applications. When a registrar post becomes vacant at the Western Cape Department of Health and Wellness, you apply for that position. If you are successful, you will then be admitted to the MMed programme.

#### Duration of programme

The training for the degree takes place over four or five years, depending on the requirements of the department/division under which your major subject falls. The term "major subject" refers to the recognised

area of Medicine in which you choose to specialise.

You must successfully complete the full prescribed training period to register as a specialist with the Health Professions Council of South Africa (HPCSA). The University will only then provide the HPCSA with signed Forms 19 and 57 confirming that an MMed degree qualification can be added to your credentials.

If you are appointed as registrar between 1 January and 31 March of the relevant year, you will graduate at the December graduation ceremony directly preceding the completion of the specific four- or five-year prescribed training period, provided that you comply with all the academic requirements of the degree at that stage.

### Clinical experience

As a candidate for the MMed degree you must prove to the satisfaction of the University that:

- you have successfully held a full-time training position according to the requirements of the relevant department/division for a period of four or five years at Tygerberg Hospital, the Western Cape Department of Health and Wellness or another institution that the University deems equivalent.
- you have received theoretical, practical and clinical training as stipulated in the "Duration of programme" section above.
- you have successfully completed the single national exit examination of the Colleges of Medicine of South Africa (CMSA).

### Exemption

- With regard to the work mentioned in the "Duration of programme" and "Clinical experience" paragraphs above, the University may grant possible partial or full exemption based on comparable training received and experience gained at another recognised institution.
- With regard to prescribed modules as mentioned in the section "Programme content" at the various MMed programmes below, the University may grant possible partial or full exemption based on modules passed at another recognised institution.

### Continuation of study

- If you do not comply with the provisions relating to promotion of your specific MMed programme and you are denied the right to continue with your MMed studies, you must vacate your registrar post with the Western Cape Provincial Department of Health and Wellness or the National Health Laboratory Services. This ruling also applies to registrars in supernumerary posts.
- Only in exceptional cases, and with the submission of an appropriate motivation and approval of the departmental programme committee concerned, and the Committee for Postgraduate Teaching and the Faculty Board of the Faculty of Medicine and Health Sciences, will you be allowed to register for the MMed programme once again.

### Single national exit examination

- To register as a specialist with the HPCSA you must successfully complete the single national exit examination in your specific field of study. This is an examination independent from that of the University and has an additional cost implication for you.
- It still remains the responsibility of the teaching department at the University to confirm the following:
  - successful completion of prescribed training time and flexible assessment;
  - completion of a research assignment according to the regulations of the University; and
  - submission of a completed case-book.

These assessment components may vary for the different MMed programmes.

### Programme description

The purpose of the qualification is to equip you as a basically qualified medical practitioner (with an MBChB or equivalent qualification) with specialised knowledge, as well as with the skills and attitudes required as a specialist in your chosen speciality, that at least agree with the requirements of the Health Professions Council of South Africa. This will enable you to function as an independent practitioner in the relevant field within any service-rendering and academic environment, by acquiring the knowledge, skills and attitudes to:

- deliver comprehensive healthcare in a conscientious manner to the patient as an individual and as a member of the community;
- develop the attitudes and abilities needed to become an independent learner and to accept the responsibility for continuous lifelong professional development, including the ability to critically evaluate and interpret the relevant literature and to apply it in the profession;
- plan, execute, interpret and publish research relevant to your chosen speciality;
- be able to move, if you so aspire, to the highest level of academic work for doctoral study and to promote an approach based on academic integrity and ethics; and

- contribute to the pool of academics and professionals with the competence and critical intellectual abilities to ensure the future advancement of your chosen speciality, and to make provision for the country's need for a skilled workforce of the highest quality and to ensure that the country remains competitive in an era of growing global competition.
